High Strength Rigid Insulation Boards

## High Strength Insulation: Most Common Applications

| Insulation | Hot Face Temperature °C | Insulation Thickness, mm | Cold Face Temperature °C |
|------------|-------------------------|--------------------------|--------------------------|
| HSCI 200   | 200                     | 15                       | 60                       |
| HSCI 300   | 300                     | 25                       | 61                       |
| HSCI 400   | 400                     | 30                       | 62                       |
| HSCI 500   | 500                     | 35                       | 62                       |
| HSI 800    | 600                     | 10                       | 270                      |
| HSCI 600   | 600                     | 60                       | 66                       |
| HSI 800    | 700                     | 10                       | 307                      |
| HSCI 700   | 700                     | 70                       | 67                       |
| HSI 800    | 800                     | 15                       | 289                      |
| HSCI 800   | 800                     | 85                       | 68                       |
| HSI 1000   | 900                     | 20                       | 290                      |
| HSCI 900   | 900                     | 65                       | 85                       |
| HSI 1000   | 1000                    | 25                       | 284                      |
| HSCI 1000  | 1000                    | 65                       | 93                       |
| HSI 1100   | 1100                    | 30                       | 290                      |
| HSCI 1100  | 1100                    | 60                       | 139                      |
| HSI 1200   | 1200                    | 30                       | 348                      |
| HSCI 1200  | 1200                    | 30                       | 262                      |
| HSCI 1300  | 1300                    | 165                      | 128                      |
| HSCI 1400  | 1400                    | 235                      | 123                      |
| HSCI 1500  | 1500                    | 285                      | 123                      |
| HSCI 1600  | 1600                    | 285                      | 126                      |
| HSCI 1750  | 1650                    | 470                      | 350                      |

## HSI 1200 | Technical Datasheet

**Wedge HSI 1200** are Calcium Silicate based Refractory Insulation Boards made of high quality refractory mineral fibers and calcium silicate bonded with high temperature clays. These insulation boards possess unique combination of properties for various industrial applications in furnace backup insulation, high temperature gasketing & seals.

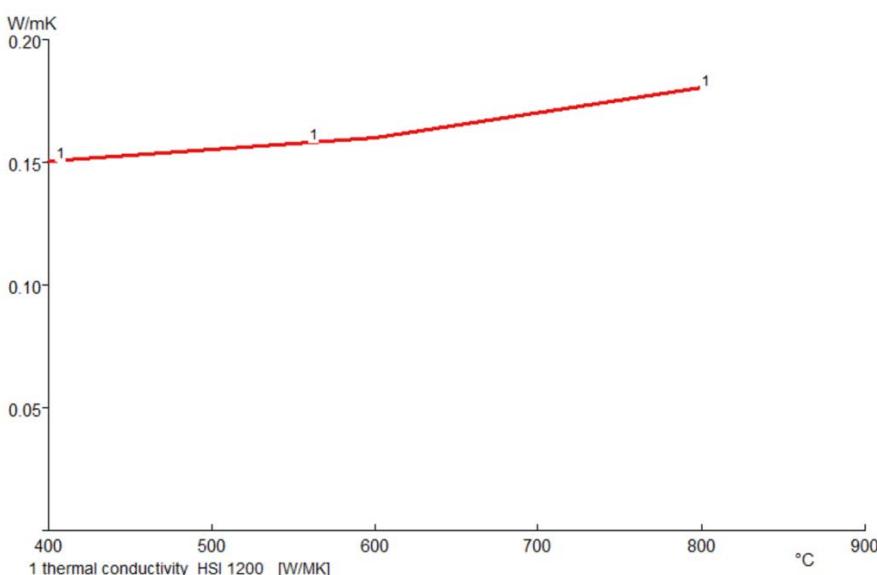

### Applications

- Ladle & Tundish Insulation
- Lime Kiln and Cement Kiln Insulation
- High temperature insulation Gaskets
- Boiler & Furnace Insulation
- Oil & Gas Burners Insulation
- Furnace, Dryer, and Oven Insulation
- High temperature Pipe Insulation
- Refractory insulation expansion joints
- Metal clad Gaskets fillers
- Gaskets for centrifugal casting
- Glass rollers as washers on mandrel
- Stainless Steel Plant Rollers Insulation
- Electrical & home appliances insulation gaskets
- Fire Resistant Doors, Lifts, Safes, Cupboards

### Features & Benefits

- Very Strong Boards with high compressive strength
- High temperature resistance upto 1200°C
- Low Thermal Conductivity at high temperatures
- High Electrical Resistance at high temperature
- High fire resistance and heat shield properties
- Easy to cut and punch
- Available in moulded pipe section for pipe insulation

| Properties                     | HSI 1200                            |      |
|--------------------------------|-------------------------------------|------|
| Base Materials                 | Calcium Silicate & Refractory Fibre |      |
| Classification Temperature, °C | 1200                                |      |

## HSI 1100 | Technical Datasheet

**Wedge HSI 1100** are calcium silicate & wollastonite fibres based boards ideal protection against electrical arcs, used for burner, boiler and dryer gaskets. These boards are made of high quality wollastonite fibres and calcium silicate bonded with high temperature clays. These insulation boards possess unique combination of properties for various industrial applications in furnace backup insulation, high temperature gasketing & seals.

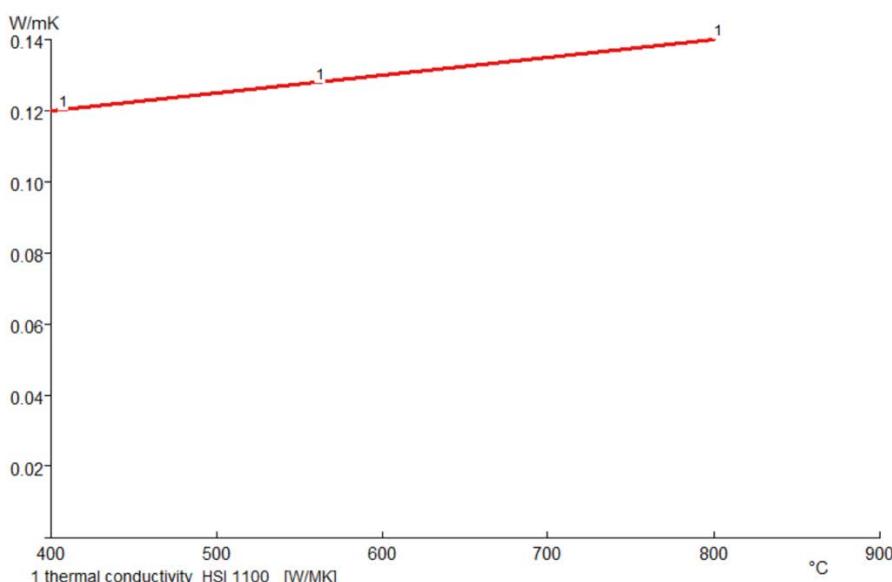

### Applications

- Ladle & Tundish Insulation
- Lime Kiln and Cement Kiln Insulation
- High temperature gasket & sealings
- Boiler & Furnace Insulation
- Oil & Gas Burners Insulation
- Furnace, Dryer, and Oven Insulation
- High temperature Pipe Insulation
- Metal clad Gaskets fillers
- Gaskets for centrifugal casting
- Glass rollers as washers on mandrel
- Stainless Steel Plant Rollers Insulation
- Electrical & home appliances insulation gaskets
- Fire Resistant Doors, Lifts, Safes, Cupboards

### Features & Benefits

- Very Strong Boards with high compressive strength
- High temperature resistance upto 1100°C
- Low Thermal Conductivity at high temperatures
- High Electrical Resistance at high temperature
- High fire resistance and heat shield properties
- Easy to cut and punch
- Available in moulded pipe section for pipe insulation

## HSI 1000 | Technical Datasheet

**Wedge HSI 1000** are calcium silicate & wollastonite fibres based boards ideal for high temperature backup insulation, fire protection, fire doors, electrical home appliances, electrical arcs, furnace backup insulation, high temperature gasketing, duct fire protection, pipe insulation, fire & insulation seals, high temperature electrical insulation, etc.

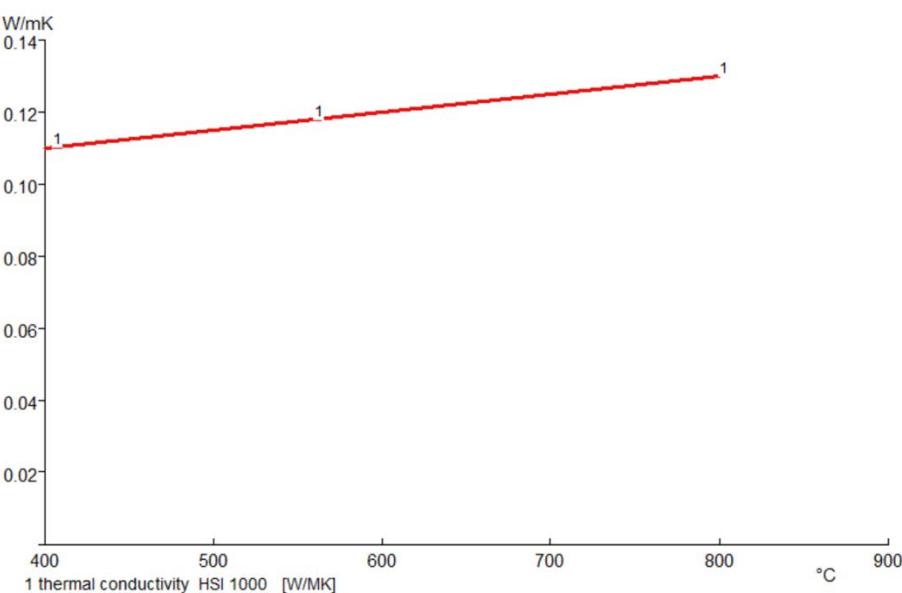

### Applications

- Ladle & Tundish Insulation
- Lime Kiln and Cement Kiln Insulation
- High temperature gasket & sealings
- Boiler & Furnace Insulation
- Oil & Gas Burners Insulation
- Furnace, Dryer, and Oven Insulation
- Pipe & duct Insulation
- Metal clad Gaskets fillers
- Gaskets for centrifugal casting
- Glass rollers as washers on mandrel
- Stainless Steel Plant Rollers Insulation
- Electrical & home appliances insulation gaskets
- Fire Resistant Doors, Lifts, Safes, Cupboards

### Features & Benefits

- Very Strong Boards with high compressive strength
- High temperature resistance upto 1000°C
- Low Thermal Conductivity at high temperatures
- High Electrical Resistance at high temperature
- High fire resistance and heat shield properties
- Easy to cut and punch
- Available in moulded pipe section for pipe insulation

| Properties                     | HSI 1000                               |      |

## HSI 800 | Technical Datasheet

**Wedge HSI 800** are rockwool fibres based boards made of high temperature clay bonded with rockwool fibres. These boards have classification temperature of 850°C. These boards are most suitable for pipe insulation applications to reduce "Corrosion Under Insulation" in mineral wool pipe insulation applications.

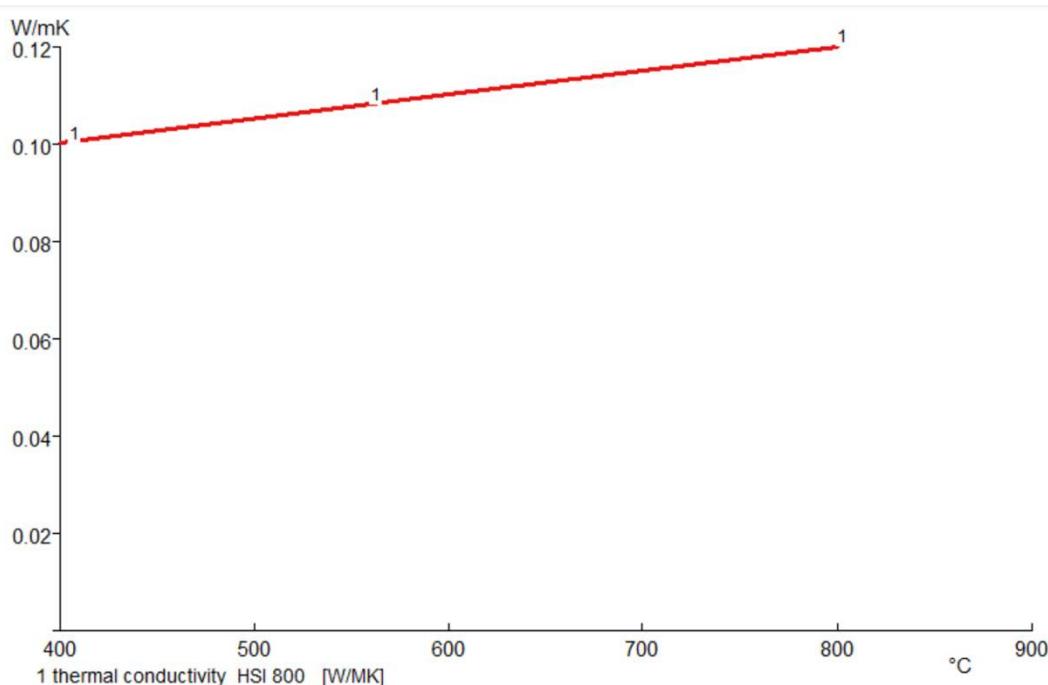

### Applications

- Pipe Insulation & Pipe Support
- High temperature gasket & sealings
- Boiler & Furnace Insulation
- Oil & Gas Burners Insulation
- Furnace, Dryer, and Oven Insulation
- Pipe & duct Insulation
- Metal clad Gaskets fillers
- Aluminium & Steel Plant gaskets seals
- Electrical & home appliances insulation gaskets

### Features & Benefits

- Strong Boards with high compressive strength
- High temperature resistance upto 850°C
- Low Thermal Conductivity at high temperatures
- High Electrical Resistance at high temperature
- High fire resistance and heat shield properties
- Easy to cut and punch
- Available in moulded pipe section for pipe insulation
- Good in reducing "Corrosion under Insulation"

| Properties                     | HSI 800                            |

## AG06 650 | Technical Datasheet

**Wedge AG06 650** are low density, low thickness, flexible commercial grade Aerogel Blanket having extremely high performance in pipe insulation in both industrial and buildings applications. The AG06 650 aerogel insulation blankets are made of high quality silica aerogel and of glass fiber needled blanket.

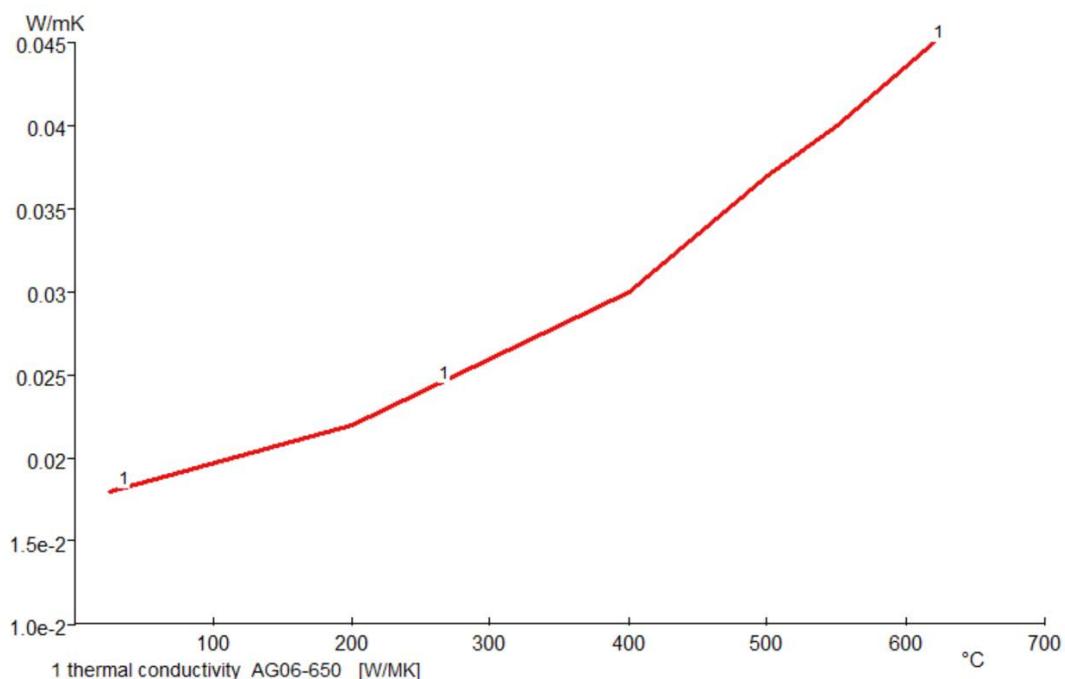

### Applications

- Hot Water / Gas / Oil Pipeline
- High heat Steam Pipeline
- Petrochemical industry & power generation
- Back-up insulation in refractory lined pipes
- Exhaust systems
- Filler material for mattresses, cassettes, heat shields, expansion joints
- Prefabricated pipe with insulation
- Tanks, vessels and other equipment
- Pipe line insulation in Petrochemical plants
- Automobile, high-speed, train, and subway
- Building and Construction
- PFP (Passive Fire Protection)

### Features & Benefits

- Lightweight, thin, custom made & very flexible
- Noncombustible & Environmentally friendly
- Resistant to most chemicals
- Superior Insulation Performance
- 4 to 5 times better than traditional insulation products with longer service life
- Reduced Insulation Thickness
- Hydrophobicity and Fire-proof
- Repel water from penetrating into pipes
- A1 rating of fire-proof
- Transportation Costs Savings
- Lower packing volume and lower weight can greatly cut down logistics costs

| Properties                            | AG06 650       |
|---------------------------------------|----------------|
